Academic/Educational Visit to IBS Gurgaon

Introduction

An academic visit to IBS Gurgaon was conducted on September 8, 2026, to provide students with practical exposure to entrepreneurship, innovation, and the corporate environment. This visit offered an invaluable opportunity for students to extend their learning beyond the classroom and gain insights into the process of translating concepts into viable business ventures. The primary objective was to foster an entrepreneurial mindset and demonstrate how real-world challenges can be converted into innovative business opportunities.

Accompanying Faculty

The visit was under the supervision of Convenor, Prof. Rajanikant Verma and Faculty Co-ordinators, Prof. Urmila Bharti, Dr. Shubra Pant Kothari, Dr. Bharat Khurana, Dr. Renu Kumari.

Academic Session: Ideas to Startups

The core academic session, titled "Ideas to Startups: How Entrepreneurs Turn Problems into Business," featured Dr. Vikram Sharma. Dr. Sharma shared personal experiences and professional insights on identifying and capitalizing on market opportunities, fostering an engaging and interactive dialogue with the students.

The program also included sessions with IBS Gurgaon alumni, who shared their professional experiences, followed by a competitive quiz. Six students represented our college in teams of two across three rounds, culminating in a rapid-fire session. Our teams performed commendably, securing first, second, and third place with prizes of ₹1,000, ₹700, and ₹500, respectively.

Concluding Remarks and Enactus Presentation

The visit concluded with an address by the Convenor, Prof. Rajanikant Verma, who invited Ananya, President of the Enactus Society, to present on the society's initiatives. Ananya outlined the mission of the student-led entrepreneurship society and highlighted ongoing and upcoming projects, including: Project Vayu, Agricultural Waste Valorization, Temple Waste Management and Project Re-Vastra.

Ananya also proposed continuing the initiative of conducting drives at NGOs throughout the year. Following Ananya, Diksha provided feedback regarding the site visit and finally Dr. Shubra Pant Kothari delivered the vote of thanks to formally conclude the proceedings.

Following the visit, students were provided with a campus tour subsequent to their lunch. The campus tour featured an introduction to the language and AI laboratories, providing the students with a novel and insightful experience.

The academic visit proved to be an insightful and enriching experience for all the students involved. It provided an opportunity to interact with the faculty and students, gain a better understanding of the institution, and exchange ideas beyond the classroom environment. The visit also helped in strengthening professional connections and encouraged students to explore new academic and career opportunities.

We extend our gratitude to Prof. Rajanikant Verma and the accompanying faculty members for organizing this enriching professional experience.

In summary, the visit was successfully executed and provided a valuable learning experience. It underscored the significance of academic exposure, collaboration, and meaningful engagement in student development. Following the conclusion of the visit, the students departed for their campus at 4:00 p.m.
